

THE INTERNATIONAL HEADQUARTERS OF THE SUFI MOVEMENT

Office HQ

Wisdom is the art of being responsive to the opinion of others while understanding the limitations of one's own preconceived ideas.

An opening call to the Federation of the Sufi Message California 2013

Hazrat Inayat Khan said:

“The Message will take care of itself because it is a Divine Message “.

Many years have threaded away; but may these powerful words still be heard in our time, as an encouragement to all those who are motivated in the work for the Cause, as well as for those who wonder where the ship is sailing in years to come.

In this confused world-situation, where political dictatorship as well as religious sectarian fanaticism prevails like dark clouds in the sky, the hidden working of the Message can obviously be seen at various levels, such as the struggles for Social wellbeing, as well as in Scientific researches and Industrial creativity.

Courageous are those, who, like shining rays, follow the path leading to “Spiritual Liberty”, each proceeding in accordance with their own wisdom.

Wisdom is not a religion, nor is it a secret school of speculative interpretations of Truth.

Wisdom is an open door, with true understanding for the original inspiration of all beliefs. Wisdom cannot be limited by descriptive terminology, which generally misinterprets true realization. Wisdom cannot be identified as being the property of one single transmission because of its Universal nature.

The Federation of the Sufi Message is a home where Sisters and Brothers meet with the purpose of understanding each other and learning from each other. In this blessed home, the example of each is aimed to be a humbly offer of Love, Harmony and Beauty to humanity, with the hope that some day, the world shall become a better place.

With most heartiest greetings
from your Sufi Brother and Sister Hidayat and Aziza
